

Ibrahim Shanaa

Full Stack Software Engineer

Saida, Lebanon • +961 76 760016 • ibrahim.shanaa122@gmail.com • [LinkedIn Profile](#) • [GitHub Portfolio](#)

Summary

An impact-focused Full Stack Engineer dedicated to building high-performance web applications that solve real-world business problems. Adept at translating complex requirements into clean, scalable code and collaborating within agile teams to ship products that deliver measurable value and intuitive user experiences.

Technical Skills

- **Languages & Runtimes:** JavaScript (ES6+), TypeScript, Node.js, SQL, PHP
- **Frameworks & Libraries:** React.js, Angular, Express.js, Tailwind CSS, Bootstrap
- **Databases & Infrastructure:** MySQL, MongoDB, Docker
- **Tools & Methodologies:** Git, GitHub Actions (CI/CD), RESTful APIs, Performance Tuning

Professional Experience

ERP System Coordinator & Tester | Ak-Trading | Saida, Lebanon | *Jun 2023 – Present*

- Spearheaded the end-to-end testing for a mission-critical ERP system, identifying and resolving 50+ critical bugs pre-deployment to ensure 99.9% system stability at launch.
- Engineered a streamlined communication protocol between a 5-person development team and business stakeholders, slashing issue resolution time by 30%.
- Authored comprehensive training documentation and led technical onboarding for 15+ staff, driving a 90% system adoption rate within the first 30 days.

Freelance Web Developer | Self-Employed | Remote | *May 2024 – Present*

- Architected and deployed 5+ full-stack client websites, delivering an average 25% uplift in user engagement and achieving consistent 90+ Google PageSpeed scores.
- Integrated complex third-party APIs (Stripe, shipping logistics) to automate core business processes, reducing manual client workload by an average of 10 hours per week.

Full Stack Angular Developer | VestaCare | Saida, Lebanon | *Feb 2023 – May 2023*

- Shipped 8 major features for a high-traffic healthcare application, enhancing workflow efficiency for its 500+ active clinical users.
- Executed a targeted code refactoring initiative that reduced the client-side bug rate by 20% and improved long-term codebase maintainability.

Projects

Danab-Wheels ERP System | Lead Developer

- Architected and built a full-stack ERP system from the ground up, automating inventory and sales workflows to reduce manual data entry requirements by 40%.
- **Technologies:** Node.js, Express.js, MySQL, React.js, Tailwind CSS

Electrack - Task & Energy Management | Full Stack Developer

- Engineered a secure MERN stack application for real-time energy monitoring, implementing JWT-based authentication and role-based access control (RBAC).
- **Technologies:** MongoDB, Express.js, React.js, Node.js, JWT

Education

Bachelor of Science, Computer Science | Lebanese International University | *Expected 2026*
